DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

I. Claims 1-23 drawn to an electrical circuit board and a method of fabricating the same; a bottom-gate TFT array substrate and a method of fabricating the same; and a liquid crystal display device according to the 1st-3rd aspects.

II. Claims 24-41 drawn to a bottom-gate TFT array substrate and a method of fabricating the same, and a liquid crystal display device and a method of fabricating the same according to the 4th-7th aspects.

III. Claims 42-59 drawn to a bottom-gate TFT array substrate and a method of fabricating the same, and a liquid crystal display device and a method of fabricating the same according to the 8th-11th aspects.

IV. Claims 60-77 drawn to a bottom-gate TFT array substrate and a method of fabricating the same, and a liquid crystal display device and a method of fabricating the same according to the 12th-15th aspects.

V. Claims 78-95 drawn to a bottom-gate TFT array substrate and a method of fabricating the same, and a liquid crystal display device and a method of fabricating the same according to the 16th-19th aspects.

VI. Claims 96-101 drawn to a bottom-gate TFT array substrate and a method of fabricating the same, and a liquid crystal display device and a method of fabricating the same according to the 20th-23rd aspects.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
